ANGELA JELLY D. GARDAN

I am a dedicated and detail-oriented BSIT student with a strong background in programming and software development. I know how to use basic Java, C++, and JavaScript, and I have good experience creating websites that look good and work well using HTML, CSS, and JavaScript. I also build mobile apps that work on both Android and iOS using React Native and Android Studio. I'm familiar with using Firebase for features like user authentication, and real-time databases. I am a fast learner who is always excited to explore new technologies and apply what I've learned to real-world projects.
